Profile

Senior Flutter Developer with 5+ years in mobile development, including experience as a Tech Lead. Strong in Clean Architecture, Reactive UI, modular DI. Skilled at leading teams, mentoring developers, and driving code quality, while delivering scalable, high-performance applications with seamless backend integration.

Key Skills

Languages & Frameworks: Dart, Flutter, Flame

Backend & APIs: REST API, GraphQL, Supabase, Firebase

Databases & Storage: Drift(SQLite), key-value(hive,getstorage)

Other: Oracle Cloud, RevenueCat, Qonversion, Appsflyer, SKAdNetwork, auto_route, Sentry, CI/CD - codemagic, bloc, clean architecture

Professional Experience

Senior Flutter Developer - Fintech, Mobile Banking

June 2025 – Present

- Leading development of mobile banking features with Clean Architecture, BLoC, and modular DI.
- Designing and optimizing Flutter multi-module apps with strong separation of concerns (data, domain, presentation).
- Collaborating with backend teams to integrate REST APIs

Tech Lead – Subscription App Development Team

November 2022 – February 2025

- Led a development team, making key technical decisions and planning application architecture.
- Set up CI/CD pipelines (Codemagic), reducing build times from 30 minutes to 10 minutes and boosting development speed.
- Increased annual app output from 2 to 3 apps (plus a reskin of an older app) through improved processes.
- Implemented test keys on a remote server to streamline builds for QA, reducing communication overhead with developers.

Mobile App – Beauty Experts Booking & Search

February 2022 – September 2022

- Developed a mobile app for Android and iOS from scratch, including UI and business logic.
 - Implemented features for expert search, service booking, and user reviews.
- Technologies: Flutter, REST API, Redux, Firestore.

Mobile App – Food Delivery

September 2021 – January 2022

- Created a food delivery application for Android and iOS from scratch and deployed it to Play Market and App Store.
- Technologies: Flutter, REST API, GetX, Firestore, Firebase, Codemagic.

Web App – CRM System

January 2022 – March 2022

- Added new functionalities with a focus on UI/logic development and test writing.
- Technologies: Flutter, AWS GraphQL, Freezed, Bloc, Cubit, GetIt, Unit Tests (Mockito).

Other Projects:

- Mobile app for fitness and home workouts
- Projects include additional mobile apps for food delivery

Flutter Developer – Outsource Startup

January 2019 – September 2021

flutter developer, in outsource startup. making mobile ios and android apps +graphql
